

Strength and Dependability in Every Fiber

Twines and Monofilaments

Commercial, industrial, and agricultural businesses across North America have long trusted **Guelph Twines Ltd.** for a complete range of strong yet lightweight twines and monofilaments uniformly manufactured for optimal handling qualities and a wide range of applications.

Twisted Twine

Our twisted tying twines are our most widely used twines. Made from virgin polypropylene for maximum performance, our twisted twines are suitable for just about any application because of their strength, softness, lightweight, and excellent knotting characteristics. To further ensure optimal performance, our polypropylene twines are resistant to moisture, mildew, and chemicals.

Baling Twine

Our baling twines serve any company with a manual industrial baling machine, from supermarkets and big-box stores to pharmacies, office supply centers, hospitals, carton manufacturers, and more. Whether baling scrap metal, cardboard, or carpeting, our heavy-duty polypropylene baling twines are as strong as baling wire. Yet they're easier to use, more economical, and safer.

Flat Ribbon Twine

Providing a broad bearing surface for safely securing sensitive items, our flat ribbon twine (particularly used by greenhouses in RASSPE tying machines) comes in four standard sizes to ensure the binding and shipping needs of most businesses.

Greenhouse Twine

We help agricultural businesses thrive with a wide range of soft, uniform twines ideal for supporting greenhouse vegetables, including unique twines developed for tomatoes and peppers. Agricultural businesses also use our twines for nursery tree branch support, root ball tying, grape vine support, Christmas tree baling, and many other applications.

Twisted Monofilament Twine

Our monofilament twines are made by taking multiple ends of white polypropylene monofilament and twisting them together to create a strong and durable twine. We then overlay the twisted lines with a thicker blue monofilament line, meant to hold the twine together in its twisted form. The result is a strong, uniform twine that can be used for various purposes.

Available Sizes

Twine

All our twines come with center-pull coiling for easy dispensing. To ensure hassle-free handling and optimal workflow, all our tying twines (except greenhouse twines) come in various sizes to ensure you always have convenience in the palm of your hand.

Monofilament

Averaging 5.8 grams per dernier, our trusted monofilament rope yarns are also available in a range of colors and sizes.

Standard Sizes Kept in Stock for Fast Shipping

To help ensure your business operates smoothly, we keep most standard twines and monofilaments in stock for same-day or next-day shipping.

Custom Specifications

If you need something manufactured to your specifications on a short lead time, give us a call. We typically ship 80 cartons to a pallet (any mix of sizes). For orders of 60 cartons or more, freight is prepaid. (We ship to major centers in Canada only.)
