

**Guelph Twines Ltd.** has been providing commercial, industrial, and agricultural businesses throughout North America with a complete range of lightweight twines designed for optimal handling qualities and a wide range of applications.

## Twisted Twine

Our twisted tying twines are our most widely used twines. Made from virgin polypropylene for maximum performance, our twisted twines are suitable for just about any application because of their strength, softness, lightweight, and excellent knotting characteristics. To further ensure optimal performance, our polypropylene twines are resistant to moisture, mildew, and chemicals.

## Baling Twine

Our baling twines serve any company with a manual industrial baling machine, from supermarkets and big-box stores to pharmacies, office supply centers, hospitals, carton manufacturers, and more. Whether baling scrap metal, cardboard, or carpeting, our heavy-duty polypropylene baling twines are as strong as baling wire. Yet they're easier to use, more economical, and safer.

## Flat Ribbon Twine

Providing a broad bearing surface for safely securing sensitive items, our flat ribbon twine (particularly used by greenhouses in RASSPE tying machines) comes in four standard sizes to meet the binding and shipping needs of most businesses.

## Greenhouse Twine

We help agricultural businesses thrive with a wide range of soft, uniform twines ideal for supporting greenhouse vegetables, including unique twines developed for tomatoes and peppers. Agricultural businesses also use our twines for nursery tree branch support, root ball tying, grape vine support, and many other applications.

## Christmas Tree Twine

Christmas tree tying twine is an essential resource for any tree farmer. It secures your product for transport, ensuring each tree arrives safely at its destination without damage. We also offer a variety of Christmas Tree tying twine colours so you can align a twine colour with the price of the tree (i.e. based on the tree's height).

## Twisted Monofilament Twine

Our monofilament twines are made by taking multiple ends of white polypropylene monofilament and twisting them together to create a strong and durable twine. We then overlay the twisted lines with a thicker blue monofilament line, meant to hold the twine together in its twisted form. The result is a strong, uniform twine that can be used for various purposes.

“

*We find the quality and durability of twine we get from Guelph Twines is excellent. Other twines fall apart after its first use. With Guelph Twines, we can use it over and over again!*

*Dave Soehner  
Head of Brewery Operations, Elora Brewing Company*

”

## Variety of Sizes

All our twines come with centre-pull coiling for easy dispensing and come in various sizes to ensure you always have convenience in the palm of your hand.

## Fast Shipping

To help ensure your business operates smoothly, we keep most standard twines in stock for same-day or next-day shipping.

## Custom Orders Available

If you need something manufactured to your specifications on a short lead time, give us a call. We typically ship 60 to 100 cartons to a pallet. We offer prepaid freight to most Canadian cities for orders over 60 cartons.

Established in 1972 by industry visionaries from the Brantford Cordage Company, Guelph Twines Ltd. quickly became known for product quality and innovation by the comprehensive experience of its founders.

Today, Guelph Twines retains the same quality reputation and strength of experience as a third-generation family-owned business manufacturing twines, monofilaments, and cable fillers for many commercial, industrial, and agricultural businesses across North America.

In everything we do, our products reflect the experience of our cordage industry employees, dedicated to the values of product quality, reliability, innovation, fast order fulfillment, and exceptional customer service and satisfaction. We are here to deliver.
